Is the U.S.-Led Security Architecture in East Asia Falling Apart?

Elliot Waldman | Tuesday, Sept. 10, 2019

“When historians look back on this day, they will probably conclude that the unraveling of the U.S.-centric defense and security architecture in Northeast Asia began with this Korean decision”

FEATURES | SECURITY

China and the U.S. Alliance System

The U.S. is likely to find its system of alliances and partnerships in Asia an increasing source of contention with China.

What is security architecture to you?

- A. A large multilateral alliance (NATO) or many inter-connected alliances
- B. A large institution or many inter-connected institutions that deal with security (among other things)
- C. A “security community” that sees states working together on security issues
- D. Processes or norms that groups of states adopt to resolve security issues

“Architecture”

- Order?
- Framework?
- Mechanism?
- Structure?
- System?
- Institution?

Architecture as order:

the ‘*Pax Americana*’; architecture as a defence system that promotes outcomes – such as conflict management and avoidance – as well as a rules-based, maritime-based, trading order which broadly favors US norms and standards, while also enriching key regional stakeholders.

“Architecture”

- Order?
- Framework?
- Mechanism?
- Structure?
- System?
- Institution?

Architecture as ‘community-integration’:

the ‘ASEAN Way’, where process and community-integration are more important than outcomes or policy and where hierarchy is avoided in favour of consensus in institutions, such as ASEAN Regional Forum, ADMM+, and ASEAN+3.

“Architecture”

- Order?
- Framework?
- Mechanism?
- Structure?
- System?
- Institution?

Architecture as community-building:

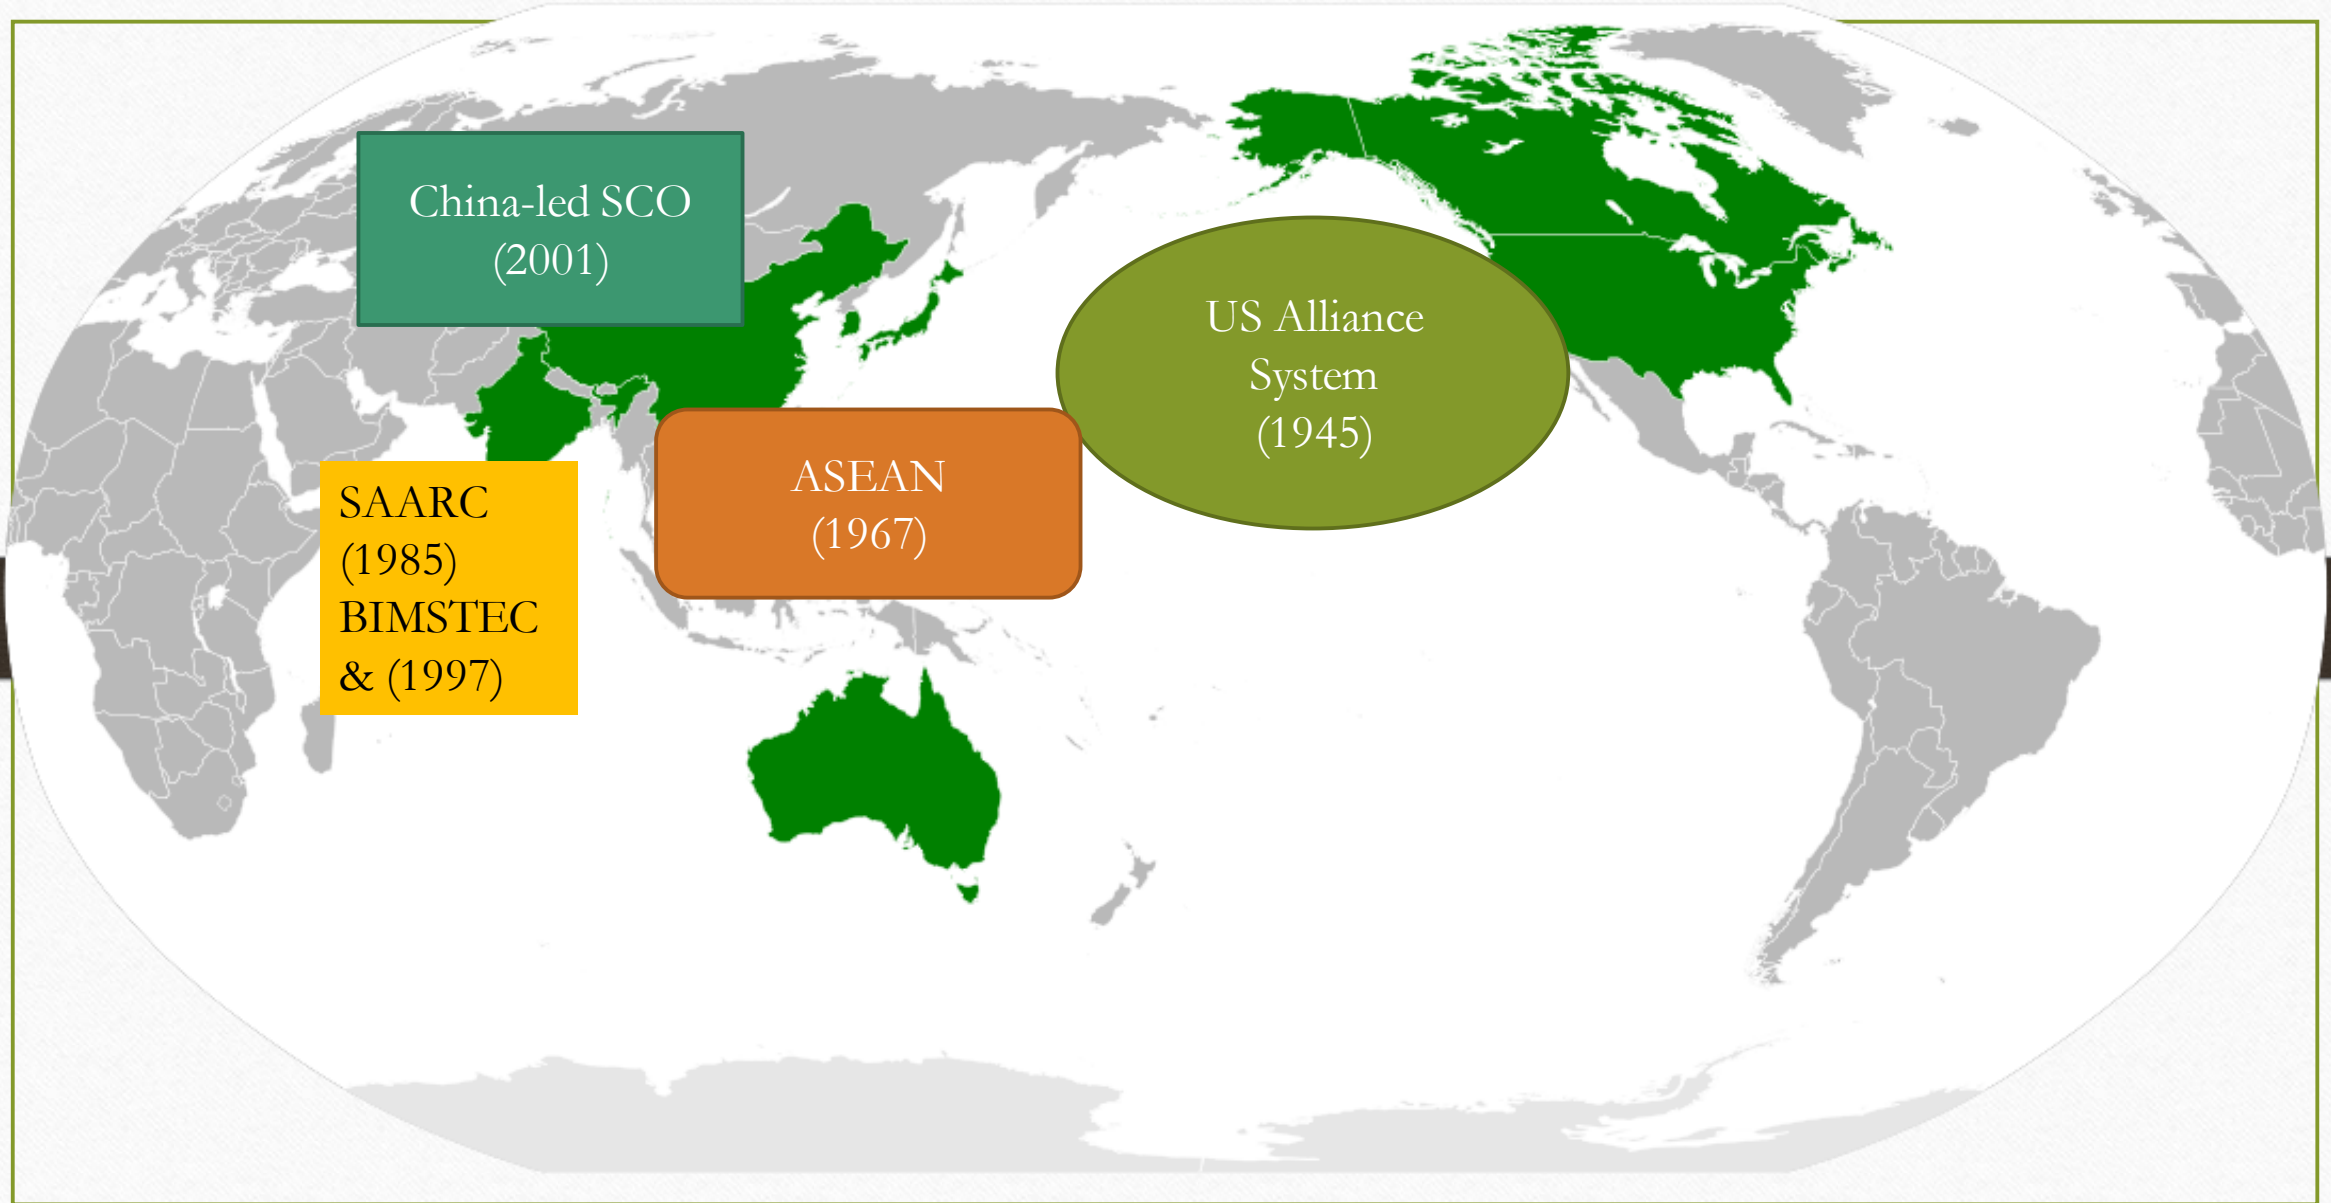

The South Asian Association for Regional Cooperation and the Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation (BIMSTEC) are both large aspirational bodies, working across a range of issues.

“Architecture”

- Order?
- Framework?
- Mechanism?
- Structure?
- System?
- Institution?

Architecture as integration:

The ‘China Dream’, a new type of tributary system, in which deference to the PRC’s security preferences are instilled into regional countries as they become increasingly integrated with the PRC’s economy and its sphere of influence.

BIMSTEC
& (1997)

-Pax Americana: the San Francisco System

- 1. A dense network of formal security alliances
- 2. A ‘hub-and-spokes’ - mostly bilateral - network radiating from Washington to allies.
- 3. An asymmetrical deal, military access for defence and economic access.
- 4. Special precedence for Japan in the system.
- 5. Maritime-focused; Mahanian in geopolitical scope.
- 6. Evolving in terms of partnerships (trilaterals and the quad)

NEW TYPES OF ALIGNMENT IN THE SAN FRANCISCO SYSTEM

- US-Japan-ROK Trilateral (1994)
- US-Japan-Australia Trilateral (2002)
- US-Japan-Australia-India Core Group (2004/5)
- US-Japan-India Trilateral (2005)
- US-Japan-India-Australia Quad (2008/2017)
- US-Japan-UK Maritime Trilateral (2016)

INTRODUCTION

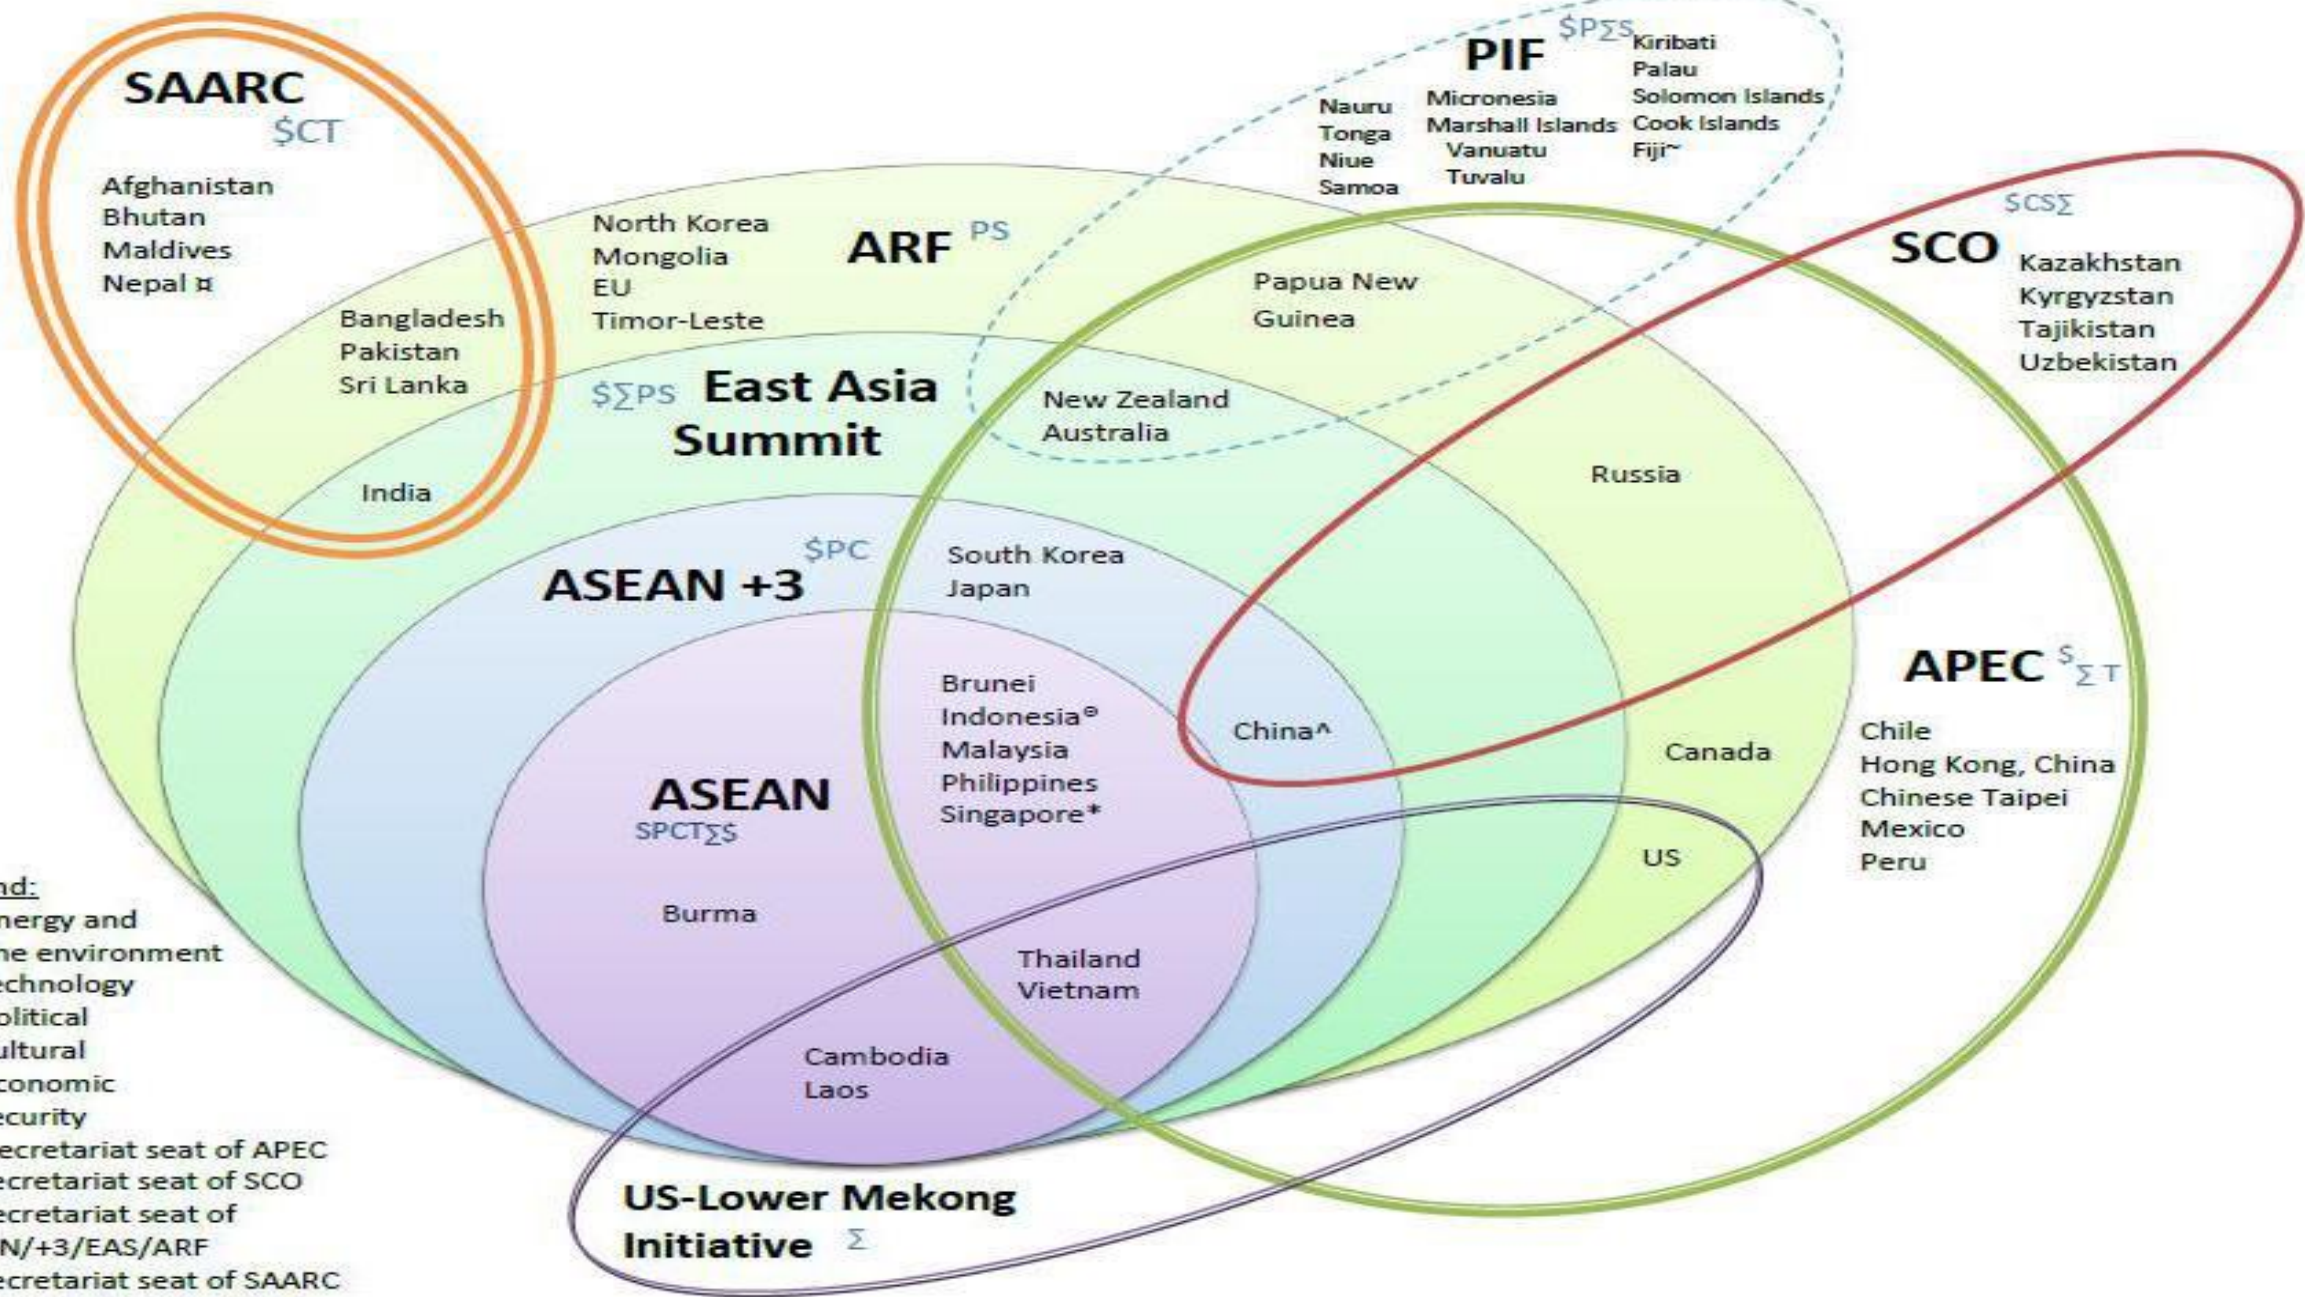

- SAARC - South Asian Association for Regional Cooperation
- SAARC is an economic and political organization.
- SAARC was established on December 8, 1985.
- In terms of population - almost 1.5 billion people.

SAARC

3: OBJECTIVES

1. Inter-SAARC
 1. Welfare to people (quality of life)
 2. Economic growth
 3. Collaboration
 - Economic
 - Social
 - Culture
 - Scientific
 4. Collective self reliance
 5. Mutual trust, under-standing and appreciation
- Intra-SAARC
 1. Inter-cooperation in national forums
 2. Domestic countries strengthening
 3. International and regional organizations

China's new regional security architecture

(expounded at 2016 *Xiangshan Forum* by Vice Minister Liu Zhenmin)

- 1) China's new security concept – which advocates common, comprehensive, cooperative and sustainable security;
- 2) regional and international norms, including the Five Principles of Peaceful Coexistence and the *ASEAN Way*;
- 3) partnerships rather than Cold War-era alliances;
- 4) a comprehensive and multi-layered network of bodies, with a focus on improving existing institutions rather than creating new ones;
- 5) the promotion of common development and prosperity.

Discussion and Questions

- 1. What are some of the structural challenges to Asian security architecture?
- 2. Should Asia's security architecture be built for and by Asians? Does this include South Asia as well as East and Southeast Asia?
- 3. What role should external powers – like the United States – play in building Asia's security architecture?
- 4. Are alliances really “cold war mentality” or merely a symptom of state insecurity and a traditional manner for gaining security?
- 5. Why is there no “NATO-in-Asia”?
- 6. Does Asia need a NATO-like organization? Who should be in it?

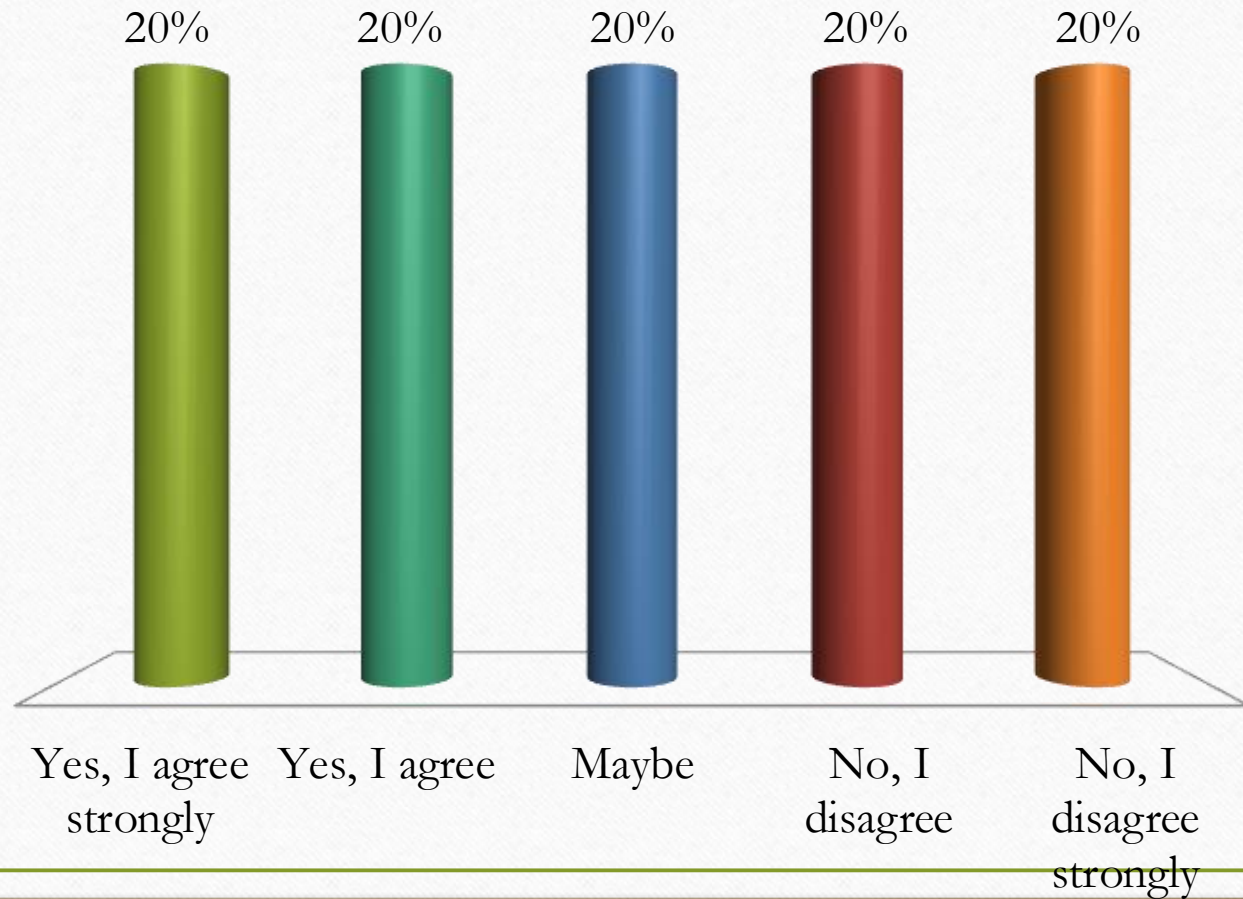

What is the best security architecture for Asia?

- A. A comprehensive system including external powers like the US
- B. “Asia for Asians”; whatever is built should be by the regional states
- C. A network that recognizes an equal role between China and India
- D. A system that prioritizes security for lesser and mid-level powers

Is a NATO-like organization in Asia needed?

- A. Yes, I agree strongly
- B. Yes, I agree
- C. Maybe
- D. No, I disagree
- E. No, I disagree strongly
